**SeQual Technologies Launching Oxygen Therapy Systems
into Canadian Home Healthcare Market**
Government Agency Approves Eclipse® and Integra EZ™

SAN DIEGO – SeQual Technologies Inc., which develops oxygen systems known worldwide for their reliability, quality, revolutionary design and economy, announced today the introduction of the Eclipse Oxygen System® and Integra EZ™ Oxygen Concentrators into the Canadian home healthcare market following approval of the systems by Health Canada, the regulatory body overseeing the nation's health systems and programs.

The Eclipse is the only device on the market that provides continuous flow operation of up to 3 liters per minute in a lightweight portable unit to meet a patient's stationary and ambulatory needs. The Integra EZ are home-based units that deliver up to 10 liters per minute of continuous oxygen while providing "night silent" operation.

Stu Novitz, SeQual's North American Sales Manager, said the Canadian introduction of the Eclipse and Integra EZ is part of SeQual's ongoing commitment to serve oxygen therapy providers on an international level. The company recently launched the Eclipse in Europe and SeQual Technologies Co., Ltd., a joint venture of SeQual and Tatung Corp. of Taiwan, is currently distributing the Eclipse in Asia.

"We are pleased to add Canada to a growing list of countries that have recognized SeQual products as effective and valuable systems that improve the lives of a growing population of patients needing oxygen therapy," Novitz said. "We look forward to working with Canadian providers to introduce our breakthrough systems to respiratory patients from British Columbia to Nova Scotia."

SeQual units earmarked for Canadian operation are currently being distributed out of the company's San Diego headquarters while it considers sales and delivery channels in Canada. The Canadian oxygen therapy market is estimated to be roughly 11% the size of the U.S. market.

SeQual Technologies Inc.

Founded in 1991, SeQual offers a family of innovative products ranging from the 3 LPM (liter-per-minute) continuous flow portable Eclipse to its popular, compact, easy-to-use bedside 10 LPM unit. SeQual's air separation systems are used for industrial applications such as water

purification, oxygenation for aquaculture, producing feed gas for ozone generators, or for any other processes needing high-purity, dry oxygen or nitrogen on site. SeQual is a private company is based in San Diego. For more information, see www.sequal.com.
