**SEQUAL TECHNOLOGIES ANNOUNCES A NEW
DIRECTOR OF SALES, THE AMERICAS**

SAN DIEGO — SeQual Technologies Inc., a San Diego-based medical equipment manufacturer which develops oxygen systems known worldwide for their reliability, quality, and revolutionary design and economy, announced the appointment of Adrian Knight to the position of Director of Sales, the Americas. Knight will be responsible for sales team leadership, driving revenue, as well as, general management responsibilities within North and South America.

Since 2007, Knight has been SeQual's National Manager of Clinical Support where he worked closely with sales representatives and providers both nationally and globally. In this role, he worked with renowned clinicians to create CEU and pulmonary rehab programs for both providers and their referral sources. His background as a RT and former owner of a DME and Sleep Lab give him a wealth of knowledge to draw from when fine-tuning the sales team vision. Knight will also be working closely with product management and engineering providing input from customers and cutting-edge ideas on new product development.

"We are pleased to announce Adrian as Director of Sales," says Ron Richard, CEO. "His sales and marketing expertise along with his entrepreneurial talent make him an ideal fit for the position. We are confident he will create new sales opportunities and aid in achieving our goals in this marketplace—financially and clinically."

The SeQual focus is clinical efficacy—Educate. Regulate. Saturate. "We believe by utilizing our technology, a provider can grow his business through a non-delivery model without sacrificing patient care," explains Adrian Knight. "That message shows great promise in this industry, I look forward to this new and exciting opportunity."

About SeQual Technologies Inc.

SeQual Technologies, founded in 1991, is a market-driven, technology-based company with the mission to develop, manufacture and market unique products for medical, military, industrial and commercial applications that utilize the Company's proprietary pressure swing adsorption (PSA) technology for air separation. Since 1998, the Company has focused on the development of medical oxygen concentrators; devices that separate oxygen from air to provide supplemental breathing oxygen to individuals with chronic lung disease. SeQual's line of medical oxygen concentrators ranges from its recently introduced, award-winning, Eclipse 2 oxygen system to its Integra high-capacity (10 liter per minute) bedside unit. In addition to medical oxygen systems the Company manufactures other PSA-based, air separation systems for a wide variety of commercial, government and industrial applications. The Company also pursues strategic partnerships with customers, or other interested parties, to develop new products for specific applications.
